

NUTRITIONAL PRODUCT AND METHOD FOR OPTIMIZING
NUTRITIONAL UPTAKE IN EQUINE FOALS AND OTHER ANIMALS

ABSTRACT OF THE DISCLOSURE

5 A novel nutritional product and methods for the
manufacture and administration of the same are
disclosed for the feeding of equine foals and other
animals. The nutritional product of the present
invention is effective in supporting the growth and
10 health of equine foals, and in supporting and
stimulating its immune system as well. The
nutritional product of the present invention consists
of safe and natural ingredients rather than drugs, and
is orally administrable. The ingredients of the
15 nutritional product of the present invention when
combined provide a synergistic efficacy which greatly
exceeds the sum of the efficacies of the individual
ingredients, making the nutritional product highly
effective in promoting and enhancing the growth,
20 nutritional uptake, and immune system of equine foals.
